Education

Yale University

Predctoral Fellow, Tobin Center for Economic Policy, 2025–26

Visiting Student, Department of Economics, 2025–present

Ph.D. coursework: Industrial Organization I (Honors); Econometrics of Dependent Data /

Econometrics IV (Honors); Measure Theory and Integration (Fall 2026)

Audited: Econometrics III; Industrial Organization II

Stockholm School of Economics, Sweden

M.S. Economics (with Ph.D. Econometrics I and II, Stockholm University), 4.68/5.00,

President’s List, 2025

Visiting student (Erasmus+): Bocconi University, data science and AI coursework, Spring 2025

Charles University Prague, Czech Republic

B.S. Economics and Finance, with Highest Honors, summa cum laude, 3.81/4.00, 2023

Thesis: “[Markups and Public Procurement](#)”, awarded the highest grade

Visiting student (Erasmus+): Maastricht University, econometrics coursework, Spring 2023

Fields

Industrial Organization (primary)

Econometrics (secondary)

Public Economics

Fellowships & Awards

[32nd Young Economist of the Year Award](#) (First Place), Czech Economic Society, 2025

[8th Lindau Nobel Meeting in Economic Sciences](#), Royal Swedish Academy of Sciences, 2025

Erasmus+ Scholarship, Maastricht University (NL) and Bocconi University (IT), 2023 and 2025

President’s List Award (top 10% of cohort), Stockholm School of Economics, 2025

Dean’s Merit Award (excellent academic results), Charles University, 2023

Research

Research Assistant, Yale University, Professors Seth Zimmerman and Barbara Biasi, 2025–26

Research Assistant, IIES Stockholm, Professor Ingvild Almås, 2024–25

Research Assistant, CERGE-EI Prague, Professor Matěj Bajgar, 2022

Working Paper

Markups and Public Procurement: Evidence from Czech Construction Tenders — First Place, 32nd Young Economist of the Year Award, Czech Economic Society, 2025

This paper analyzes the effect of public procurement on firm markups, using a panel dataset of Czech construction firms from 2006 to 2021. Markups are estimated through a structural framework, while biases are addressed using a selection-on-observables design and models for unobserved factors. Propensity score-based estimations indicate that firm markups increase by

approximately 15% during contract years. A temporal analysis, employing synthetic control and matrix completion methods, reveals that treatment effects decline from around 30% in 2006 to 10% in 2021. These patterns are consistent with institutional improvements in the Czech Republic and offer empirical evidence of increasing efficiency in public spending on construction projects.
