Working Paper

Markups and Public Procurement: Evidence from Czech Construction Tenders

First Place, Young Economist of the Year Award, Czech Economic Society, 2025

A structural production-function analysis of a 2006–2021 panel of Czech construction firms: procurement raises firm markups by about 15% in contract years, with the premium falling from roughly 30% to 10% over the period. Revised and extended during Yale Ph.D. coursework, 2025–26.
